PAKISTAN: Civil Unrest

Continued disturbances in Lahore and the threat of new opposition activity may portend increasing trouble for the martial law regime as Pakistan moves toward civilian rule. Doctors in Lahore are violently protesting the Punjab provincial government's decision to allot scarce jobs in public hospitals using a test that questions physicians on Islam and other nonmedical subjects. Rival student factions there have clashed over the death of a student leader. The government has arrested opposition politicans in Lahore and Karachi to forestall meetings protesting recent constitutional reforms that grant immunity to martial law administrators and the continued detention of opposition leader Benazir Bhutto.

Comment: Provincial authorities have been unable to resolve the protests of the doctors in Lahore—the opinion maker for Pakistan's most influential province. The unrest may develop into a wider protest against government actions—including Islamization and the constitutional changes—particularly if the volatile student population joins in. President Zia almost certainly is worried that such disturbances will disrupt the transition to civilian government, and he is likely to intervene to calm the situation when he returns to Pakistan this weekend.

White Reactions

nonwhite areas.

SOUTH AFRICA:

Pretoria has tried to curb whites who have sought their own solutions to the unrest. The government recently blocked efforts by liberal white students and clerics to follow the example of progressive white politicians, businessmen, journalists, and academics who have held talks with African National Congress officials in Zambia this year. Police have harassed both blacks and whites in at least one community-Port Alfred in Cape Province-for successfully negotiating a fragile modus vivendi apparently without Pretoria's approval.

increasingly use knives, guns, and grenades. Arson attacks, usually carried out with gasoline bombs, also are spreading in white and

According to press reports, many whites are leaving the country to escape the violence, the ailing economy, or the draft—the latter especially because resident foreigners can be conscripted under a

continued

-	Top Secret

law introduced late last year. Foreign firms are actively recruiting professionals for positions abroad. The magnitude of this trend is not yet known; government statistics indicate more people immigrated to South Africa than left the country in the first quarter of the year. Most whites, moreover, lack the skills or means—especially given the current low value of the South African rand—to settle in another country without a major reduction in their standard of living

White vigilante attacks are likely to become more common. The white populace has long been heavily armed, and gun dealers are reporting strong sales. Already there have been scattered incidents involving white civilians firing on nonwhite looters, attackers, or passers-by.

Outlook

Black anger has risen to a point where present security measures are unlikely to stifle the unrest. Attacks against whites will continue and perhaps increase. At some point the government is likely to respond to rising white concerns—either overnight or step by step—with more repressive and extreme measures to squelch the violence.

If Pretoria uses unbridled force to stop the unrest, its limited reforms will have far less chance of calming black anger over the long term. There are already signs that its iron-fist approach has done lrreparable damage to its relations with nonwhites.

	Special Analysis	
BRAZIL:	Sarney Administration Performing Well	
	President Sarney in his first six months in office has guided Brazil through a smooth transition to civilian government following 20 years of military rule. No longer regarded as a stan in for the late President-elect Neves, Sarney is now setting his own policy course and apparently beginning to install his cabin choices. His major challenges in the coming year probably will be rising inflation and a huge burden of foreign debt, but they a unlikely to undermine the fledgling democratic process.	et
	Sarney has improved his political standing and kept his opponents balance by taking on popular issues; he has instituted direct presidential elections, legalized banned political parties, and public condemned austerity measures prescribed by the IMF. His moves have preempted prominent leftist politicians, particularly Governor Brizola of Rio de Janeiro, who has refrained from attacking Sarney y remains a focal point for potential opposition.	ly
	The administration has successfully controlled labor so far through negotiations and moderate increases in real wages. The two major labor confederations, however, have agreed to cooperate in bargaining with employers and may launch a general strike in early November to demand additional concessions.	
	The armed forces solidly back the President. Sarney has avoided the kind of military opposition surfacing in Argentina by forgoing drasticuts in the military budget and vowing to limit investigations into parabuses of human rights. He has brokered compromises between Congress and the armed forces on sensitive military-related legislation.	c [′]
-		
	continued	

The relaxation of fiscal and monetary policies has contributed to a resurgence of domestic demand, helped economic growth reach 6 percent, and improved living standards this year. But at the same time the policies are raising borrowing requirements in the public sector and domestic credit as a percentage of GNP to record levels. Government price controls have been only partially effective; inflation this year probably will substantially exceed last year's rate of 210 percent.
Problems Ahead
Brasilia probably will face growing economic disorder early next year, when inflation is likely to surge following expected easing of price controls. A sharp jump in prices probably will damp the confidence of domestic business and further sour relations with foreign creditors. At worst, a substantial contraction of exports would render Brazil unable to meet its debt-servicing obligations.
The President will retain sufficient political support to stay in office over the next year, even with recurring economic difficulties. Brizola and other leftists favor a direct presidential election in 1986, but the military and most civilian political groups would be reluctant to remove Sarney before the constituent assembly scheduled to convene in early 1987.
